ExactTint[®] Alkyd Dispersion

ExactTint[®] Alkyd Dispersions are designed for the tinting of solvent and oil based products, especially wood stains and conventional alkyd-based coatings of all types. The product line consists of 19 color concentrates, composed of high quality pigments dispersed in a modified long oil alkyd vehicle and mineral spirits. These colorants are controlled to very stringent color standards, and give the user batch to batch tinting uniformity that is unequalled by competitive products.

Key Features:

- Compatible in all conventional, solventborne alkyd coatings
- Compatible in most solventborne alkyd-modified coatings systems
- Excellent stability of color and strength over two year shelf life
- Capable of matching all types of wood stain colors
- Includes high strength transparent red and yellow oxides

APPLICATIONS:

- Alkyd Enamels for Wood Coatings
- Wood Graining Inks
- Wood Stains
- Alkyd-Melamine Baking Coatings
- Quick-Dry Alkyd Maintenance Coatings
- Adhesives
- Fabric Coatings

SPECIFICATIONS:

- Strength Controlled to +/- 1% Tint Strength, by Weight
- Color Controlled to < 1.0 Delta E in fmc II Color Space for Most Colorants
- Hegman Grind Minimum 6.75
