## ZincWhite

ZincWhite is a highly dispersed French process zinc oxide. This ultra-fine dispersion offers high concentration while remaining non-seeding in dispersion form. This product is designed to impart a reduced yellowing characteristic to interior alkyd enamels.

### Key Features are:

- Reduces yellowing tendency of interior alkyd enamels
- Non-Seeding concentrated dispersion
- High reactivity
- UV inhibitor
- Fast and complete dispersion in alkyd enamels
- TOFA alkyds are recommended for maximum seed resistance
- Increases hiding power
